Culture, Ethnicity, and Mental Illness Albert Gaw 1993 In recent years there has been a greater recognition of how cultural concepts, values, and beliefs influence the way mental symptoms are expressed, how individuals and their families respond to mental distresses and to psychiatric diagnosis and treatment, and how mental health care is delivered community-wide. This comprehensive, clinically oriented volume examines the expression and treatment of mental illness in the context of culture. Written by 35 international experts in the field, *Culture, Ethnicity, and Mental Illness* covers the areas of the clinical encounter in which culture plays a prominent role, including psychiatric epidemiology, psychotherapy, culture-bound syndromes, and psychiatric assessment. *Culture, Ethnicity, and Mental Illness* provides a cultural framework in the psychiatric care of a variety of groups in the United States, including African Americans, American Indians, Alaska Natives, Asian Americans, Hispanics, women, elderly people, and gay men and lesbians. There is also a chapter dealing with the impact of AIDS among minorities. Eight glossaries of ethnic terms, including foreign language characters, are included.

Red and Yellow, Black and Brown Joanne L. Rondilla 2017-07-03 *Red and Yellow, Black and Brown* gathers together life stories and analysis by twelve contributors who express and seek to understand the often very different dynamics that exist for mixed race people who are not part white. The chapters focus on the social, psychological, and political situations of mixed race people who have links to two or more peoples of color— Chinese and Mexican, Asian and Black, Native American and African American, South Asian and Filipino, Black and Latino/a and so on. *Red and Yellow, Black and Brown* addresses questions surrounding the meanings and communication of racial identities in dual or multiple minority situations and the editors highlight the theoretical implications of this fresh approach to racial studies.

Handbook of Children and Prejudice Hiram E. Fitzgerald 2019-05-21 This handbook examines the effects and influences on child and youth development of prejudice, discrimination, and inequity as well as other critical contexts, including implicit bias, explicit racism, post immigration processes, social policies, parenting and media influences. It traces the impact of bias and discrimination on children, from infancy through emerging adulthood with implications for later years. The handbook explores ways in which the expanding social, economic, and racial inequities in society are linked to increases in negative outcomes for children through exposure to adverse childhood experiences (ACEs). Chapters examine a range of ACEs - low income, separation/divorce, family substance abuse and mental illness, exposure to neighborhood and/or domestic violence, parental incarceration, immigration and displacement, and parent loss through death. Chapters also discuss discrimination and prejudice within the adverse experiences of African American, Asian American, European American, Latino, Native American, Arab American, and Sikh as well as LGBTQ youth and non-binary

children. Additionally, the handbook elevates dynamic aspects of resilience, adjustment, and the daily triumphs of children and youth faced with issues related to prejudice and differential treatment. Topics featured in the Handbook include: The intergenerational transmission of protective parent responses to historical trauma. The emotional impact of the acting-white accusation. DREAMers and their experience growing up undocumented in the USA. Online racial discrimination and its relation to mental health and academic outcomes. Teaching strategies for preventing bigoted behavior in class. Emerging areas such as sociopolitical issues, gender prejudice, and dating violence. The Handbook of Children and Prejudice is a must-have resource for researchers, graduate students, clinicians, therapists, and other professionals in clinical child and school psychology, social work, public health, developmental psychology, pediatrics, family studies, juvenile justice, child and adolescent psychiatry, and educational psychology.

A Twenty-First Century Approach to Community Change

Larry M. Gant 2017-07-19 Urban renewal has been the dominant approach to revitalizing industrialized communities that fall into decline. A national, community-based organization, the Skillman Foundation sought to engage in a joint effort with the University of Michigan's School of Social Work to bring six neighborhoods in one such declining urban center, Detroit, back to positions of strength and national leadership. *A Twenty-First Century Approach to Community Change* introduces readers to the basis for the Foundation's solicitation of social work expertise and the social context within which the work of technical assistance began. Building on research, the authors introduce the theory and practice knowledge of earlier scholars, including the conduct of needs assessments at multiple levels, engagement of community members in identifying problem-solving strategies, assistance in developing community goals, and implementation of social work field instruction opportunities. Lessons learned and challenges are described as they played out in the process of creating partnerships for the Foundation with community leaders, engaging and maintaining youth involvement, managing roles and relationships with multiple partners recruited by the Foundation for their specialized expertise, and ultimately conducting the work of technical assistance within a context of increasing influence of the city's surrounding systems (political, economic, educational, and social). Readers will especially note the role of technical assistance in an evolving theory of change.

Mental Health Care in the African-American Community

Sadye Logan 2013-01-11 Over the course of an African American's lifetime, mental health care needs change according to an individual's unique interactions with his or her environment.

Mental Health Care in the African-American Community uses this perspective to provide a deeper analysis of factors and issues affecting the mental health of African Americans. This comprehensive text provides a current and historical analysis of the impact of mental health research, policy, community, and clinical practice from a life course perspective. Stressing evidence-based practice as an expanded way to think and talk about individualizing and translating evidence into a given practice situation, this valuable book provides a social work context for all helping professions. Mental Health Care in the African-American Community provides the helping community with non-traditional, expanded ways of thinking and intervening in the mental health needs and care of African Americans. Organized logically, this complex subject presents data in a user-friendly way that engages the reader, and provides chapter summaries and suggested group/classroom activities to facilitate understanding. This text is extensively referenced and includes figures and tables to clearly illustrate data. Topics in Mental Health Care in the African-American Community include: a historical overview of African Americans' mental health care a conceptual and theoretical framework for African Americans' mental health current issues affecting mental health intervention for African Americans mental health in group homes and foster care depression substance abuse poverty ADHD suicide mental health in elderly African Americans mental health policy rural African American mental health needs kinship care multiethnic families and children much, much more! Mental Health Care in the African-American Community is a valuable textbook for practitioners; administrators; researchers; policymakers; educators; and students in social work, psychology, mental health services, case management, and community planning.

Model Programs in Child and Family Mental Health Michael C. Roberts 2014-02-04 This volume is the product of a combined effort to find programs of service delivery that demonstrably treat the varieties of mental health problems of children and their families. The Section on Clinical Child Psychology (APA, Clinical Psychology Section I) and the Division of Child, Youth, and Family Services (APA, Division 37) established a task force whose mission was to identify, provide recognition for, and disseminate information on such programs. Their findings are presented here. The opening chapter and each section overview chapter provide orientations to the program descriptions and examine characteristics of exemplary interventions. The targeted problems include: child abuse and neglect, school adjustment problems, social problem-solving problems, autism and developmental disabilities, conduct disorders and severe emotional problems, children affected by disasters and trauma, children whose parents are divorced, children of teenage parents, family dysfunction and parent-child relationships, oppositional defiant disorder, and attention deficit disorder. Settings for interventions in the model programs include: schools, mental health centers and family guidance clinics, hospitals and pediatric practices, group homes and sheltered workshops, community centers, family homes, summer camps, and coordinated systems of care. The 18 programs described demonstrate the rationale for their interventions, their targeted populations, the type of staff and personnel, various programmatic interventions, aspects of the problems, implementation of interventions, and how the programs have been evaluated. The needs for improved mental health services remain strong. The supporting organizations and the members of the Task Force intend for the product of this project to be helpful in providing models for meeting those needs.

Handbook of Marriage and the Family Gary W. Peterson 2012-09-14 The third edition of *Handbook of Marriage and the Family* describes, analyzes, synthesizes, and critiques the current research and theory about family relationships, family structural variations, and the role of families in society. This updated *Handbook* provides the most comprehensive state-of-the-art assessment of the existing knowledge of family life, with particular

attention to variations due to gender, socioeconomic, race, ethnic, cultural, and life-style diversity. The *Handbook* also aims to provide the best synthesis of our existing scholarship on families that will be a primary source for scholars and professionals but also serve as the primary graduate text for graduate courses on family relationships and the roles of families in society. In addition, the involvement of chapter authors from a variety of fields including family psychology, family sociology, child development, family studies, public health, and family therapy, gives the *Handbook* a multidisciplinary and interdisciplinary framework. *Hearings, Reports and Prints of the Senate Committee on Human Resources* United States. Parents, Children, and Adolescents Anne-Marie Ambert 1997 *Parents, Children, and Adolescents* presents an integrative perspective of the parent-child relationship within several contexts. You can expand your empirical and theoretical knowledge of the parent-child relationship and child development through the book's unusually holistic, theoretical perspective that integrates three main frameworks: interactional theories on parents, children, and development; contextual (ecological) models; and behavior genetics. This insightful book's empirical scope is broader than that of most books in that it considers the parent-child relationship throughout the life course as well as within a great variety of contexts, including interactions with sibling and peers, at school, in their neighborhoods, and with professionals. You'll gain immeasurable knowledge about: parents' child-rearing styles and how they are affected by environmental variables the interaction between parents and children, and between their personalities behavior genetics as one of the explanatory frameworks for the role of genetics and environment negative child outcomes--emotional problems, conduct disorders, and delinquency poverty and other stressors affecting parents and children problematic-abusive, emotionally disturbed, alcoholic parents siblings and peers as contexts for the parent-child dyad the effect of the school system on the family, with a focus on minority families family structure--divorce, remarriage, and families headed by never-married mothers adolescent mothers and their own mothers the psychogenetic limitations on parental influence and cultural roadblocks to parental moral authority Complete with an Instructor's Manual, *Parents, Children, and Adolescents* is ideal for advanced undergraduate and graduate classes in family studies and human development, sociology of the family, interdisciplinary developmental psychology, and social work classes that need a thorough perspective on the parent-child relationship. Professionals and scholars in these fields seeking an interdisciplinary framework as well as research suggestions and incisive critiques of traditional perspectives will also find this innovative book a valuable addition to their reading lists.

Black American Families, 1965-1984 Walter Recharde Allen 1986 This new bibliography offers access to journal articles, books and book chapters, doctoral dissertations and masters theses, government and university reports, and other materials. It covers an extended range of topics and encompasses recent work in the social sciences and health sciences, as well as the human services profession. The bibliographic section presents more than 1,100 numbered citations arranged alphabetically by author, with entries keyed to both broad topic categories and specific subjects. A classified index, with titles, lists works by category and subject, and a key word index cross-references nearly one thousand words that appear in entry titles.

Handbook of Applied Developmental Science Richard M. Lerner 2003 The *Handbook of Applied Developmental Science* is the only work to comprehensively present the latest theory, research, and application from applied developmental science

(ADS) and the positive psychology movement. It summarizes and synthesizes the best scientific knowledge from ADS to help readers understand the efforts being made around the world to ensure that all children and adolescents develop into healthy adults who contribute positively to society. The Handbook is also the first resource to organize and integrate both the prevention and promotion approaches to programs and policies for children, adolescents, and families. In addition, the Handbook provides a detailed road map for future research and for actions that will promote positive child, youth, and family development. Published in four volumes, the Handbook features 95 chapters by more than 150 contributors, many of who are renowned leaders in the field. Volume 1 describes the foundation of applied developmental science, its historical development, and current scientific and professional efforts to develop policies and programs that promote positive child, adolescent, and family development. Volume 2 examines public policy and government service systems. Volume 3 discusses community systems for enhancing citizenship and promoting a civil society. Finally, Volume 4 outlines methods for university engagement and academic outreach. Feature and Benefits - Four comprehensive, topical volumes - Approximately 2,200 pages - 95 chapters - More than 150 contributors, many of whom are world-renowned leaders in applied development science from the academic, professional, and policy and political arenas - Forewords for each volume written by well-known authorities, including Edward Zigler, co-founder of the Head Start program; US Congressman Elijah E Cummings; David Bell, International Youth Foundation; and Graham Spanier, President, The Pennsylvania State University Designed for a wide audience the Handbook will be an important addition to your library collection. ANNALS OF INTERNAL MEDICINE

The Oxford Handbook of Social Class in Counseling William Ming Liu 2013-04-26 Social class is a pervasive facet of all lives, regardless of one's own social class and status. One would think its ubiquity would make it necessary for all helping professionals to understand social class and discuss it in therapy and research. Yet social class and classism are one of the most confusing and difficult concepts to understand and integrate into research and counseling practice--mostly due to the relative lack of psychological theories, research, and quantitative data. Fulfilling this need, this handbook summarizes and synthesizes available research on social class and classism in counseling practice and research areas. The 32 chapters included offer up-to-date, fascinating, and provocative applications of social class and classism, as seasoned chapter authors provide an overview of theories related to social class and classism and its application toward research, education, training, and practice. Chapters include comprehensive coverage of: - lifespan issues related to social class, such as unique aspects of social class and classism in the lives of children, adolescents, and older adults - how social class is studied and empirically understood through research,

assessment, and practice - implications of social class in career counseling, psychological assessment and diagnosis, and the therapy relationship - how social class is implicated in positive psychology, career and work psychology, and health psychology - social class and classism and its connection to whiteness, racism, sexual orientation, religion and spirituality, and social justice This book offers the first compendium of counseling related resources on social class and classism and will be a comprehensive, must-have reference for professionals and academics in counseling psychology and related fields for years to come.

Family Ethnicity Harriette Pipes McAdoo 1999-04-20 Family ethnicity involves the unique family customs, proverbs, and stories that are passed on for generations. This volume provides extensive information about the various cultural elements that different family groups have drawn upon in order to exist in the United States today. The sections cover Native American Indians, Native Hawaiians, Mexican American and Spanish, African American, Muslim American, and Asian American families.

Children's Mental Health Beth A. Stroul 1996 This volume presents along-overdue "road map" for providing affordable and comprehensive mental health services to children and youth of all races, cultures, and socioeconomic backgrounds. Incorporating the diverse perspectives of parents, policy makers, practitioners, administrators, and researchers, this groundbreaking work discusses... conceptual framework: a new paradigm for comprehensive, individualized, family-focused, and culturally competent mental health services for young children and adolescents; system development at federal, state, and local levels: the planning, financing, and structure of various government and community-based initiatives, including the Ventura County (CA), the Robert Wood Johnson Foundation Mental Health Services Program for Youth, and the Annie E. Casey Foundation systems of care; management issues: case management, human resource development, financing, service coordination mechanisms, and outcome assessment techniques; family involvement: a historical framework and practical guidelines for promoting family involvement and collaboration at the system and service delivery levels; and service delivery: new service delivery approaches for children and youth with serious challenges and multiple needs. Children's Mental Health provides articulate guidance and critical support for planning, administering, and implementing improved systems of mental health care for children. Policy makers, professionals, and parents will welcome the long-awaited insight and information that this volume delivers.

Frantz Fanon's Psychotherapeutic Approaches to Clinical Work Lou Turner 2019-12-20 Recognizing Frantz Fanon's remarkable legacy to applied mental health and therapeutic practices which decolonize, humanize, and empower marginalized populations, this text serves as a timely call for research, education, and clinical work to establish and further develop Fanonian approaches and practices. As the first collection to focus on contemporary clinical applications of Fanon's research and practice, this volume adopts a transnational lens through which to capture the global reach of Fanon's work. Contributors from Africa, Australia, Europe, and North America offer nuanced insight into historical and theoretical methods, clinical case studies, and community-based innovations to place Fanon's research and practice in context. Organized into four key areas, including the Historical Significance of Fanon's Clinical Work; Theory and Fanonian Praxis; Psychotherapeutic and Community Applications; and Action Research, each section of the book reflects an impressive diversity of practices around the world, and considers the role of political and socioeconomic context, structures of gender oppression, racial identities, and their intersection within those practices. A unique manifesto to the ground-breaking and immensely relevant work of Frantz Fanon, this book will be of great interest to graduate and post graduate students, researchers, academics and professionals in counselling psychology, mental health research, and psychotherapy.

Handbook of Families and Health D. Russell Crane 2005-06-22
Handbook of Families and Health: Interdisciplinary Perspectives presents state-of-the-art summaries of research related to couple, marital, and family influences on health. Editors D. Russell Crane and Elaine S. Marshall, along with a distinguished group of contributors across various disciplines, bring complementary perspectives to a wide range of families and health issues. A major goal of this Handbook is to highlight common issues, concerns, and goals across diverse fields and the benefits of bringing multiple perspectives to these issues. A significant portion of the book is devoted to interventions to improve family health.

Handbook of Race and Development in Mental Health Edward Chang 2011-10-02 This project is unique in the field for a number of reasons, both in structure and in content. Specifically, it will

have leading experts on specific age groups (Childhood to Adolescence, Young Adulthood to Middle Age, and The Elderly) within the cultural groups of interest (European-Americans, African-Americans, Asian-Americans, Hispanic-Americans, and Native Americans) contribute a chapter covering current research on both positive and negative functioning for each population. Each chapter will present basic demographic information, strengths that contribute to resilience, and three significant challenges each group faces to maintaining mental health. Each chapter will then include an integrative section, where ideas are advanced about how the strengths of each group can be harnessed to address the challenges that group faces. To conclude, each chapter will propose future directions for research which addresses integrative approaches to mental health for each group, and the implications that such approaches could have for future treatment. The main points of each section of each chapter will be visually summarized in a concluding table.
