course that includes 10 hours of one-on-one personal training with a dashboard instructor from Information Analytics Institute. The student learns by building dashboards (not by reading theory) and is exposed to a comprehensive collection of components and shown a wide range of design concepts and practical spreadsheet programming techniques. Breadth of knowledge is emphasized over repetitive exercises while dashboard standards and best practices are taught throughout the course. The book consists of nine chapters written in an easy to follow step-by-step format. All the instructions are accompanied by detailed color illustrations to help create the dashboards quickly and easily. A new and increasingly challenging dashboard, which introduces and teaches new concepts, is built in each chapter. Student files provided by Information Analytics Institute include a rich set of pre-constructed and mid construction dashboards available to be previewed and

examined prior to purchase. These are worked on throughout the course. The chapters are knit together by an entertaining story about Candy Cane Enterprises and how Annie Heartland and Abel Goodman struggle to overcome corporate politics to build dashboards that reveal the truth about the company's finances, sales, production, client relations and human resources. While learning to build dashboards the student is carried on a journey from the skyscrapers of New York to the islands of the South Pacific and hills of Montana. Complete with cartoon images, intrigue and a little romance, the story provides context and meaning to the tasks the student must perform. Learning was never so entertaining.
